

T.S.G.Mutyala Raju

Undamatla

Frontend Developer skilled in HTML, CSS, JavaScript, and React. I am actively seeking opportunities to contribute and grow in dynamic development teams.

EXPERIENCE

ITech Software Solutions, Amalapuram — *Technical Supporter*

July 2024 - PRESENT

I am working as a technical support executive with expertise in delivering prompt and efficient customer support. Proficient in providing technical guidance, and ensuring smooth operation of client systems. Strong communication skills with a focus on customer satisfaction and issue resolution

EDUCATION

Pragati Engineering College, Surampalem — *B.Tech*

September 2020 - May 2024

Completed Bachelor of Technology in Electronics and Communication Engineering from Pragati Engineering College.

PROJECTS

Railway Track Crack Detection

In my final year project, I developed a **Railway Track Crack Detection** system using **GPS** and **GSM** modules. The system detects cracks on railway tracks in real time and sends alerts with the exact GPS location via GSM to prevent accidents, ensuring safer rail operations.

SynergyNest

In this project, I was developing an online platform where people from different places with similar skills can connect and develop projects together. This was developed using the MERN stack.

INTERSHIPS

Tekorse Technologies

Developed an end-to-end Learning Management System (LMS) with an efficient user registration and query portal. Collaborated on gathering requirements, and utilized HTML, CSS, and JavaScript.

IBM, Frontend Developer.

I learned Technologies on Frontend development. As a front-end developer, I can easily create and implement the visual elements of a website or web application, ensuring an optimal user experience and interface. I learned technologies like HTML, CSS, JavaScript and React.js.
